This document provides the information required for schools, coaches, and students to participate in IEN competition.

All participants must also follow the requirements established in the current IEN Member Handbook.

1.2 Competition Model

Competition Type:

Team-Based

Description:

Rocket League is a team-based vehicular soccer game in which two schools compete using teams of three players. Teams control rocket-powered vehicles and attempt to score goals by striking the ball into the opposing team's net. Matches are played at a fast pace and require strong communication, positioning, mechanical skill, and teamwork. Schools earn victories by outscoring their opponents during regulation play or by scoring the winning goal in overtime when necessary.
