

ISEA League of Legends Trials Series Rule Book

View the ISEA Trials High School Competition Rulebook for details.

Introduction and Purpose

These official rules (rules) of the ISEA Trial Series Scholastics Esports League apply to each of the teams who have registered and met the requirements for the 2025-2026 school year.

1. Game Rules

1.1 Game Account Connections

Players are required to create and connect the in-game name of their Riot Games account to their ISEA Trial Series LeagueOS profile before competing in a match.

Players without in-game accounts connected are ineligible to participate in the match.

Per section (insert) Connected Accounts of the league's Competition Rulebook, teams must address missing game account connections before establishing a game of record. Reaching a game of record without confirming game accounts or addressing missing game account connections is not grounds for a match restart or loss.

1.2 Roster Requirements

Team members must be eligible to compete on behalf of their school as listed in section 2. Team Member Eligibility of the league's Competition Rulebook.

Each league page will list the number of players necessary to fill a team's roster and bench. No individual may simultaneously hold two or more roles as listed above. All players and coaches are expected to be present physically or virtually for all official ISEA Trial Series matches. The roster and bench must be finalized before the roster lock date, as listed inside of LeagueOS.

1.3 Substitutions

Substitutions must be made before the start of each game by contacting your opponent and an ISEA Trials Admin 48 hours before a scheduled match. If a substitute is already registered on the roster there is no need to go through this process, but before the match starts you must send your entire roster with all subs included to the opposing team 10 minutes before the matches starts.

Once a game of record is established, substitutions are not allowed. Once the game is complete and the results are recorded, player substitutions may be made before the start of the following game starts.

In the event a ISEA Trials admin is unavailable, rosters and substitutions must be confirmed before the start of each game unless otherwise approved by a Trials Official and stated by a ISEA Trial Series Admin in the Match Lobby Chat. Substitution request outside of the 48 hour window can be approved if both schools agree to the substitution and cannot reach a Trials administrator. Both teams will need to keep record of the agreement and who was subbed in before the match starts.

Players on the bench may be used for any match their team is competing in within their assigned league. Eligible substitutes for a match will be displayed on the roster tab of the team's roster list. Only the players shown on a team's bench can be used as substitutes in an official ISEA Trial Series Match.

If a player on the starting roster cannot compete in the match and there are no available substitutes, competition may continue without that player as long as it does not disadvantage the opposing team. No bot can be used as substitutes

1.4 Game of Record

A Game of Record (GOR) in League of Legends is established under the following conditions:

- Any attack or ability is landed on minions, jungle creeps, structures, or enemy champions.
- Line-of-sight is established between players on opposing teams.
- The game timer reaches two minutes (00:02:00).

Once GOR is established, game restarts will only be allowed under limited conditions as listed in section (insert) Game Restart of the league's Competition Rulebook.

If a game is to be restarted for any reason then both teams must still use their original roster and champions from the previous game. Each player must also play with the

original champion they were on during the previous game. All runes and summoner spells must also be the same. Failure to do so will result in a game forfeit.

1.5 Stoppage of Play

Directed Pause

- At any time, League Officials may order the pause of a match at the sole discretion of League Officials. Teams may complete the current game and finalize the results.

Player Pauses

- As long as there are no team engagements (such as team fights, or skirmishing around objectives), players may pause a match using the in-game pause function by typing “/pause” within the in-game chat.
 - They must notify a coach and identify the reason for the pause in Match Lobby Chat immediately.
- Once paused, all coaches and players must return to the ISEA Trial Series Match Lobby page (in LeagueOS), where both coaches should provide updates in the ISEA Trial Series lobby chat to address the situation.
- Pauses that are expected to last longer than 10 minutes must be approved by a League Official, and verified by a ISEA Trial Series Admin in Match Lobby Chat. If a pause last 10 minutes and an extension is not granted by an admin, then the team that called for the pause will then receive a game forfeit.
- When the pausing team is ready to unpause the game, a member of each team must confirm the resumption of play by typing “ready” or “r” in the chat. To communicate with the opponent, players will press enter, type “/all” followed by a space and the message, and then press enter again to send the message.
- Penalties will be applied at the sole discretion of League Officials under the following circumstances:
 - Excessive pauses or unpauses during active team engagements (such as team fights, or skirmishing around objectives).

- If a player pauses or unpauses a game without permission from the coaches.

Player Disconnection

- If a player disconnects from the online match during a game, the player should attempt to reconnect to the match as soon as possible. In the event of a disconnect, players should pause the game.
- If the player cannot rejoin within the allotted timeframe, the game will continue with the current players found in the lobby. Please provide a screenshot for all disconnects as proof of when the disconnection happens.

You cannot fill the spot of a disconnected player with a different player in the middle of a game. You must wait until after the game to substitute the disconnected player for another player.

Team Disconnection

- If an entire team disconnects from the online match during a game, the disconnected team must share a message in the Match Lobby Chat to notify the opposing team. If the team cannot reconnect in a timely manner, notify ISEA Trial Series Support immediately for further assistance. If the entire team cannot reconnect to the current active game or get enough players in to finish the game- the team will receive a game forfeit and will be able to continue play with a new lobby if applicable.

1.6 Match Format

Format	Best-of-Three (Bo3) regular season and playoffs
	Best-of-Five (Bo5) Grand Finals

Mode	Tournament Draft
Team Size	5 players

Each team will compete in a match consisting of Bo3, with the winner of each game determined by the following:

- The team that destroys the opposing team's Nexus.
- The winner of the match is determined by the team who wins two games first.
- If a single team reaches two game wins before the start of the third game, then the third game will not be played.

All matches within the season will share the same Match Format as listed above, regardless of phase or stage.

1.7 Specific Rules

New Champion Rule

- Any **new** or **reworked** champion newly added will be banned for 2 weeks after their released date. Meaning rescheduled matches will have to abide by this rule even though the match may be played after the 2 week window.

Draft Tools

- Teams can choose to use online draft tools to facilitate the draft pick process. Both rosters must agree to use the online draft tool. Since the Trial Series will **NOT** be using the Fearless Drafting Method- it is encouraged that teams use the in game client or use a Drafting Tool
 - <https://drafter.lol> is a tool that is available and approved by the ISEA Trials Admin team.

Custom Matches and Level Requirements

- For matches where tournament codes are unavailable, custom lobbies must be created using the steps listed in the League of Legends Match Instructions.
- There is no minimum level requirement that will be enforced. However, it is strongly recommended that summoner accounts reach level 10, which is the minimum level required to access all summoner spells in the game and will also allow you to create custom rune pages.

Role Assignments and Role Swaps

It is highly suggested that teams join the game lobby in their most likely position order:

- Top
- Jungle
- Mid
- Bot
- Support

Players are free to swap roles during the champion selection for any reason.

Error During Draft

- If any champion is incorrectly picked or banned during the draft process, the team who selected incorrectly must notify their opponent immediately in the ISEA Trial Series Match Lobby Chat.
 - If the draft is complete before correcting the error, the game must be paused immediately upon loading into the game.
 - The notification must include the champion selected incorrectly and the champion they intended to select at that time.
- Teams must restart the tournament draft process immediately if there is a mistake or game client error. The draft should then be restarted and brought back to the point at which the error occurred, so that the team in error may correct its mistake.

- All previous picks and bans except the mistakenly chosen champion must remain the same.
 - If all players are already loaded into the game, every player must exit the game using the "ESC" key to reset the match. Once all 10 players have left the game, a new lobby can be created using the same tournament code as before.
-

2. Player Equipment

2.1 Equipment

Each player on the starting roster must have access to school-provided equipment or must be permitted by the school to provide their own equipment in the following categories:

- PC that meets the minimum [Computer Specifications](#)
- Mouse and Keyboard
- Stable Internet Connection

2.2 Riot Vanguard

Riot Vanguard is Riot Games' custom in-house game security software designed to upload competitive integrity when playing League of Legends. This software is required to access League of Legends, and schools must ensure their PCs are set up properly before their first match. If a school computer is blocked by Riot Vanguard, an IT Administrator will be needed to access and edit the computer's BIOS settings to enable TPM 2.0, Secure Boot, IOMMU, HVCI/VBS, and switch to UEFI mode.

A full support article for this highly technical process can be found on [Riot Games' Support for Riot Vanguard \(League of Legends\)](#).

3. Match Process

3.1 Pre-Match Setup

Teams must adhere to section 6.2 Pre-Match Setup in the league's Competition Rulebook as they prepare to join their match.

3.2 Match Setup

Join Lobby

Teams will follow League of Legends Match Instructions for lobby creation setup and joining the game lobby.

Side Selection

Each team will compete as either blue side (team 1) or red side (team 2) for each game. Side selection for each game is as follows:

Game 1	Home team
Game 2	Away team
*Game 3	Loser of game 2

*For playoffs, The higher seed receives a side selection for game 3.

Tournament Draft

Once all ten players have reported to the official game lobby, one member of each team confirms team readiness for the pick/ban phase. Once both teams confirm readiness, the room owner will start the game.

Clicking Start Game will take all participants into the tournament draft mode. Draft format phase orders proceeds as follows:

If you use the Drafting Tool- you will just follow the drafting sequence to match what was set in the online Drafting Tool.

	Ban Phase #1	Pick Phase #1	Ban Phase #2	Pick Phase #2
1.	Blue Team	Blue Team	Red Team	Red Team

2.	Red Team	Red Team	Blue Team	Blue Team
3.	Blue Team	Red Team	Red Team	Blue Team
4.	Red Team	Blue Team	Blue Team	Red Team
5.	Blue Team	Blue Team		
6.	Red Team	Red Team		

3.3 Match F.A.Q.

Spectating

- In order to avoid giving any team an advantage, spectators should be removed from spectating unless both coaches have agreed to allow for a spectator. The team who is spectating the match must provide the stream link before the match can start. Should the stream go down the match can be paused no longer than 5 minutes in total before the match must continue and the spectator must leave the match.

In-Game Content Updates

- League of Legends is a live-service multiplayer game that may release new content patches with updated in-game content during the season.
 - New champions added to League of Legends during the regular season may be available for use in a ISEA Trial Series match. Any champions or items currently disabled in-game by Riot Games will not be available to use in ISEA Trial Series official matches. ISEA Trial Series will attempt to provide further information on these updates before they are available.
 - Any champion added to League of Legends after the regular season has ended will not be available for Playoffs. Champion Reworks will be monitored on a case by case basis dependent on the level of design in which the champion is reworked. League Officials will monitor these changes and announce rulings as quickly as possible
-

4. Post Match Process

4.1 Results

Results will be automatically recorded after a match has ended in League OS.

If a player uses a League of Legends account that is not connected to their ISEA Trial Series profile, the match will automatically be quarantined, and coaches will need to contact ISEA Trial Series admin directly to resolve the issue.

If tournament codes could not be used and a custom match was created, statistics are not tracked, and the match results must be submitted manually within 1 hour of match completion. Players should take screenshots of the match results and share those with their coaches.

In the event of an error, coaches must contact ISEA Trial Series admin directly.
